CROWDERTRACK Quality Sliding Door Hardware

www.kncrowder.com

What makes **CROWDERTRACK** better?

K.N.Crowder is committed to providing the Sliding Door Industry with quality engineered, durable, time-tested door hardware.

Crowdertrack was formed in the late 1940s. Since that time we have had the pleasure of supplying quality sliding door hardware to the Construction Industry.

Help and cooperation from Architectural Hardware Consultants, Lumber Dealers, Wholesale and Retail Hardware houses has been paramount to our continued growth and success.

We wish to acknowledge this support and express sincere thanks to all our many friends and valued customers for this continuing support.

“This catalogue represents a proud body of engineering work serving the Sliding and Folding Door hardware industry.

Our engineering experts are always more than happy to discuss your specific hardware needs.

Commitment to our customers’ continued satisfaction is our primary goal.”

PETER CROWDER
President,
K.N.CROWDER MFG. INC.

new

How to Specify CROWDERTRACK

To assist us in understanding your specific needs and processing your order flawlessly, there are **three items we need to know**, in addition to the dimensions, about your installation:

1 Determine your door type requirements.

Examples are: Single Track pocket, front, top or rear mounted, Dual Track By-passing, 2 Single tracks employed as Dual By-passing, Bi-folding/Pivot. Thumbnail views of suitable uses are shown in this catalogue for quick reference.

2 Estimate or determine the door weight

you will need to accommodate. A reference table below is shown to assist with this calculation. A thumbnail view of recommended capacities are shown in this catalogue for quick reference.

3 Determine your opening size.

Charts of standard sizes and configurations, as well as hardware required are shown on each product page of this catalogue, where applicable. Consider allowances and clearances for recessed pockets where applicable.

If you require alternate configurations or have special track requirements, we would be more than happy to discuss your needs.

Average Door Weight (lbs) for 7ft [2134mm] 1-3/8" [34.9mm] thick

Door Width	Hollow Wood Core	Solid Pine	Hollow Core Steel	Solid Oak
12"	14	21	28	35
18"	21	32	42	53
24"	28	42	56	70
30"	25	53	70	88
36"	42	63	84	105

For 8ft [2438mm] doors, 1-3/8" [34.9mm] thick, multiply by 1.14 for approx. weight

For 7ft [2134mm] doors, 1-3/4" [44.5mm] thick, multiply by 1.25 for approx. weight

For 8ft [2438mm] doors, 1-3/4" [44.5mm] thick, multiply by 1.50 for approx. weight

NOTE: SPECIFICATIONS ARE SUBJECT TO CHANGE WITHOUT NOTICE

PRECISION GROUND Bearings

WE HAVE REDESIGNED our nylon ball bearing wheels & hangers. The new and improved hangers will now be supplied with our new precision ground bearings.

These new precision ground bearings will easily handle the same load capacity (weight) but are virtually silent and incredibly smooth.

We have cycle tested* our new hangers to the equivalent of over 30 years of normal use (over 150,000 cycles) without experiencing any measurable wear or increase in noise.

* One cycle = one opening and one closing of the door

“Ken Newton Crowder, my father, started the business with the idea that he wouldn’t put his name on the product unless he was 100% sure that his customer would be satisfied.” — PETER CROWDER, PRESIDENT, K.N.CROWDER MFG. INC.

Throw a
curve
into your office! Spice it up!

KN Crowder, a leader in the sliding door track industry, introduces their new curved track system.

THE NEW CURVED door track system departs from the traditional 'boxy' office look and enables interesting spaces to be created using curved walls and doors. It is ideal for all pocket door applications. Concealed doors create a more spacious looking environment.

new

Sliding doors, whether curved or straight, save tremendous amounts of floor space compared to hinged doors. Curved tracks can be top mounted and Side-Mount brackets are available for wall-mounted applications. Almost all tracks and guide channels can be curved to meet the exact specified dimensions. With a 24" [610mm] minimum, any radius can be accommodated in any arc length. The curved sliding door track system is quiet and durable and ensures that the door's glide is extremely smooth.

KN Crowder is committed to innovation. We provide the sliding door industry with quality engineered, durable and time-tested hardware through our Crowdertrack line of sliding door products. Crowdertrack is as 'smooth as flight'.

CRT-100 SERIES

ROUND BAR TRACK SERIES

new

CRT-101 HANGER TOP MOUNT

NEW & MODERN Crowdertrack Round Bar Track (CRT) series starts with our Top Mount hanger for wood doors. Prominent & Exposed hardware for surface mounted barn door style applications: featuring large, 3-1/2" [88.9mm] diameter, delrin wheels with polished stainless steel side plates. Delrin has excellent strength and wear resistance while providing minimal friction. Combined with precision ball bearings, these wheels provide extremely smooth and silent door operation. Precision machined and polished Solid 304 Satin Stainless Steel round bar track and hardware components combined for state-of-the-art appearance.

- **CRT-100 Track** Polished 304 Satin Stainless Steel 1" [25.4mm] Solid Round Bar weighing 2.700 lbs. per foot.
- Load Capacity **350 lbs. (two hangers)**
- Load Capacity **450 lbs. (three hangers)**
- Load Capacity **600 lbs. (four hangers)**

CRT-101 COMPLETE KIT FOR ONE DOOR

- 1 - CRT-100** 1" round bar track x length based on kit size. (eg. 72" [1829mm] Kit for 36" [914mm] wide door)

- CRT-111-WB** wall mount brackets for round bar track (quantity is based on kit size). Complete with 5/16"-18 socket cap screws with expansion shields.

- 2 - CRT-101** top mount hangers complete with anti-lift and screws

- 2 - CRT-110** shock absorbing stops (clamps around 1" [25.4mm] bar)

- 1 - C-914** aluminum guide channel x length based on kit size (eg. 72" [1829mm] kit = 36" [914mm] long guide channel)

- 1 - C-913** aluminum floor guide complete with screws

NOTE: Alternate Heavy-Duty and Wall Mount Guides shown on page 70

CFT-201 HANGER WITH CFT-200 TRACK DETAIL

FLAT BAR TRACK SERIES

new

CFT-202 HANGER

NEW Crowdertrack Flat Bar Track (CFT) series features Fashionable & Original Strap Mount Hangers for wood doors. Ideal for barn door style hardware to mimic the old-school flat track sliding system used in Barns. Mimicking the traditional flat track system used in barns, of steel rollers on a steel bar, this series is ideal for industrial style barn doors. The CFT series is available in 304 Stainless Steel polished to satin finish, and steel with Black Finish. Other finishes available upon request. This series is only suitable for 1-3/4" [44.5mm] thick doors.

Our **CFT-202 Hanger** requires two 3/4" [19.1mm] holes per hanger in order to clamp the wood door to the hanger.

- **CFT-200-SS Track** Polished 304 **Satin Stainless Steel 1/4" [6.4mm]**
x 2" [50.8mm] **Solid Flat Bar** weighing 1.720 lbs. per foot.
- **CFT-200-BP Track** Black Finish **Cold Rolled Steel 1/4" [6.4mm]**
x 2" [50.8mm] **Solid Flat Bar** weighing 1.700 lbs. per foot.
- Load Capacity **300 lbs. (two hangers)**
- Load Capacity **450 lbs. (three hangers)**
- Load Capacity **600 lbs. (four hangers)**

**Up to
300 lbs.
per door**

CST-700 SERIES

CROWDER STACKING TRACK – ROOM DIVIDER

For light and medium duty folding partitions and stacking door systems. Hangers with axial bearings carry door and permit pivoting or cornering as required. Top mount track system with bottom guide channel available.

- Use with Extruded Aluminum **CST-700 Track**, 6063T5 Alloy
- Single center mounted hanger for pivoting/rotating applications up to 100lbs.
- Dual hanger systems for cornering and stacking partition and multiple door pocket systems (200lbs. per door)
- Bottom guide system is recommended. In the event that it is not an option, surface or flush bolts are required to stabilize the doors.

CST-700 TRACK WITH CST-710 HANGER DETAILS:

POSSIBLE CONFIGURATIONS:

"H" STACKING (STYLE 1)

(DOORS STACK PERPENDICULAR TO CLOSED POSITION DOORS)

"F" STACKING (STYLE 2)

(DOORS STACK PARALLEL TO CLOSED POSITION DOORS)

"FW" STACKING (STYLE 3)

(FULL WALL. DOORS STACK PERPENDICULAR TO CLOSED POSITION DOORS. IDEAL FOR APPLICATIONS WITH NO POCKET FOR STACKING DOORS)

"FD" STACKING (STYLE 4)

(DOOR(S) STACK PARALLEL TO CLOSED POSITION DOOR(S). IDEAL FOR FLUSH DOOR APPLICATIONS)

SIDE WALL STACKING (STYLE 5)

(DOORS STACK PARALLEL TO CLOSED POSITION DOORS ON SIDE OF A WALL. IDEAL FOR APPLICATIONS WHERE POCKET IS NOT POSSIBLE)

POCKET DOORS (STYLE 6)

(DOORS STACK PARALLEL IN A POCKET TO CLOSED FLUSH DOORS, UP TO 3 DOORS)

ENCLOSURE FOR TV OR CLOSET (STYLE 7)

(SPECIAL APPLICATION FOR ENCLOSING TV UNIT, CLOSET, OR OTHER)

PIVOT STACKING (STYLE 8)

(DOORS OPERATE ON ONE HANGER PER DOOR FOR PIVOTING ACTION. MAXIMUM DOOR WEIGHT: 80LBS)

NOTE: FOR CUSTOM CONFIGURATIONS, PLEASE CONTACT K.N. CROWDER FOR MORE INFORMATION.

COME-ALONG SYSTEM

new
& IMPROVED!

CROWDER COME-ALONG

Door Hardware permits easy operation of By-Passing Door Systems. In multiple door applications, closing the lead door results in the second and successive doors following along. Similarly, when opening the doors, operating the leading door results in other doors stacking and moving jointly to the storage position. Where possible, the continuous stability provided by the **C-202** (for 1-3/4" [44.5mm] doors) and **C-238** (for 1-3/8" [34.9mm] doors) series Guide Thresholds result in a smooth, easy to operate system. Where unobstructed floors are necessary, the door mounted **CA-200** or **CA-913** Guides with the **C-201** or **C-914** Guide Channel will provide bottom stability. For special door thicknesses and number of doors, please contact customer service for more information.

ALTERNATE GUIDE OPTIONS FOR COME-ALONG SYSTEMS:

SEE PAGES 70-71 FOR MORE DETAILS

CONTINUOUS
C-202-3 Guide Threshold for 1-3/4" [44.5mm] thick doors.
C-238-3 also available for 1-3/8" [34.9mm] thick doors.

new & IMPROVED!

C-914 Guide Channel.

CA-200 OR CA-913 SIDE-MOUNT GUIDES when used, must be installed directly below **CA-38** bracket(s) (as illustrated on left).

KNCROWDER **new** STAINLESS STEEL HANGERS

C-538-SS Hangers with C-538 Track

K.N. CROWDER introduces a new line of Stainless Steel Hangers to go with our standard aluminum track. Ideal for applications exposed to moisture, saltwater, and other factors. It is recommended the aluminum track be Clear or Bronze Anodized for use with the Stainless Steel Hangers. For more information on our Stainless Steel Hangers, please contact customer service.

STAINLESS STEEL HANGERS:

- 304 Stainless Steel Bolts & Machined Components
- 440C Stainless Steel Precision Ball Bearings
- C-400-SS, C-500-SS, C-538-SS, & C-994-SS bearings with molded Nylon Tires
- C-995-SS bearings with Stainless Steel Tires

C-995-SS HANGER WITH C-204 TRACK DETAIL

KNC has always aimed to make the highest quality sliding door track & hardware but also tackles new challenges and custom applications. This is where our one of a kind and a first in Canada, High Security Door System comes in. Our High Security Door system, created from modifying our best selling **C-108** & **C-110** Fascia series, and using our Heavy-Duty **C-810** Hanger provides the standard smooth & quiet sliding door operation *with* the addition of security. This system will prevent users from tampering with the assembly or operation of the door.

THIS PAGE SHOWS A COMPLETE SIDE-MOUNT HIGH SECURITY DOOR SYSTEM.

With our new **C-108S** track mounted to the wall with a custom bulk head above for the fascia to rest against, the door would be hung using our modified **C-810S** Continuous Hanger. Using our **C-914** Guide Channel recessed in the bottom of the door in conjunction with our **CSM-913-2HD** Side-Mount Guide results in rigidity and stability at the bottom of the door without obstructions on the floor. Using the new **C-110S** Security Fascia and fastening it to the track with tamper proof torx bolts creates a fixed and solid system that cannot be tampered with. For high security sliding door lock, our **C-90L-CC** Lock and Pull completes the system (see pages 72–75 for more details).

Our High Security Door System is ideal for hospitals, institutional use as well as for other applications requiring tamper resistant hardware. For more information, details and availability of our High Security System, please contact customer service.

CSM-913-2HD

Heavy-Duty Side-Mount Guide with 2 rollers provides more stability to the bottom of the door. See page 70 for more details.

Specially designed **C-108S** track and **C-110S** fascia allows for fascia to be fastened with torx screws, therefore making it tamper proof.

C-810S Continuous Hanger uses the same concept as the **C-810** with minimal clearance between the bottom of the track and the top of the hanger body. The continuous hanger is fabricated to provide complete and secure support across the whole width of the door. Complete with Torx screws and end caps.

HOW TO HANG **HEAVY-DUTY** DOORS

INTRODUCING ONE OF OUR NEWEST PRODUCTS

The Complete Side-Mount **new** Sliding Door System

KNC has always aimed to make the highest quality sliding door track & hardware. Our continuous side-mounted tracks, a first in Canada, were designed to meet the needs of Canada's top interior designers. Our innovative snap-on/clip-on Fascia products provide significant cost savings and a clean appearance on concealed track applications.

THIS PAGE SHOWS A COMPLETE SIDE-MOUNT SLIDING DOOR SYSTEM. With our **C-108** Track mounted to the wall, the door(s) can be hung using the appropriate hangers as described on pages 38-45. Our heavy-duty **C-913/C-914** Guide System provides stability to the bottom of the door while the **CAS-1** and/or **CAS-2** Stops provide safe, problem free door positioning. The **C-102HD** Floor Stop provides additional stoppage for the bottom of the doors and prevents door from "kicking".

Finally, our **C-110** Fascia snaps into position covering the track and hangers, cutting down on time and expensive labour required to site fabricate a fascia or bulkhead. The **C-110** is available in Clear Anodized aluminum or paint ready primer finish from stock. Baked on enamel finishes are also available to meet job specific requirements.

HEAVY-DUTY CENTER STOP

CAS-2 Center Door Stop prevents doors from slamming into each other. (two piece kit which includes C-100HD Stop).

GUIDE SYSTEM

Recessed **C-914** Heavy-Duty Guide Channel and **C-913** Heavy-Duty Roller Guide are floor mounted in overlapping position, eliminating trip hazards on the floor.

NEW: Suitable for 1-3/8" [34.9mm] or thicker door applications.

HEAVY-DUTY END STOP

CAS-1 End Stop prevents door from sliding off end of track.

HEAVY-DUTY FLOOR STOP

C-102HD Floor Door Stop for 1-3/4" [44.5mm] doors only, is used to stop and stabilize the bottom of the door.

CANTILEVER A DOOR

new

KNC Our Cantilever System allows for a sliding door to be installed over an opening with a gap in the track system for specific needs such as a patient lift tracking system traveling from one room to the next. The Maximum cantilever gap is 8" [203mm].

THIS PAGE SHOWS A COMPLETE SIDE-MOUNT CANTILEVER SLIDING DOOR SYSTEM. With 2 pieces of our **C-108** Track mounted to the wall, the door can be hung using our **C-105-C** or **C-107-C** continuous hanger (same width as door). See page 44 for **C-105-4** with **C-108** or page 42 for **C-107-4** with **C-108** for more details. Our Heavy-Duty **C-914** Guide Channel in conjunction with our **C-913-2** Dual Roller Floor Guide provides stability to the bottom of the door, while the **CAS-1R** Stop provides safe, problem free door positioning. The **C-102HD** Floor Stop provides additional stoppage for the bottom of the doors and prevents door from "kicking".

Finally, our **C-110** Fascia snaps into position covering the track, hangers, and stops, cutting down on time and expensive labour required on-site to fabricate a fascia or bulk head. Our stock **C-110** End Caps are used on the two outside ends of the fascia, and notched **C-110** End Caps are used on the inside of the cantilever gap to cover the track while allowing the hanger to travel through. The **C-110** is available in Clear Anodized aluminum or painted primer finish from stock. Baked on Enamel finishes are also available to meet job specific requirements.

GUIDE SYSTEM

Recessed **C-914** Heavy-Duty Guide Channel and **C-913-2** Heavy-Duty Roller Guide are floor mounted in an overlap position to eliminate trip hazards on the floor.

NEW: Suitable for 1-3/8" [34.9mm] or thicker door applications.

HEAVY-DUTY FLOOR STOP

C-102HD Floor Door Stop for 1-3/4" [44.5mm] doors only, is used to stop and stabilize the bottom of the door.

POCKET DOOR KITS

VARIATIONS

new

CROWDERFRAME “DOUBLE DOOR” KIT

Crowderframe’s “**Double Door**” kit is for when an opening requires two pocket doors to operate as Bi-parting. Includes two complete pocket door kits with one continuous header track. Double Door Kits are available for door sizes: **24"** [610mm] up to **MAX 48"** [1219mm] wide X **80"** [2032mm] up to **MAX 96"** [2438mm] high doors.

Load Capacity:

TYPE C DOUBLE CROWDERFRAME = 150lbs per door

TYPE B DOUBLE CROWDERFRAME = 125lbs per door

NOTE: Using two separate kits for this type of application will not work. The single pocket door kits do not provide a continuous header track which is required for double door systems to work. Please specify door size when ordering.

CROWDERFRAME “EXTRA WIDTH” MODIFICATION KIT

Our Standard Crowderframe Kits (shown on pages 22–23) will accommodate door sizes of **24"** [610mm] – **36"** [914mm] wide X **80"** [2032mm] up to **84"** [2134mm] high. Using our Crowderframe “**Extra Width**” Modification Kit will allow the installation of doors up to **54"** [1372mm] wide.

For door widths between **37"** [940mm] – **48"** [1219mm], in addition to our standard Type C or B Crowderframe Kit, the following items are included: one header track (pre-cut to suit door size), one Foot Bracket, one 96" [2438mm] x 1" [25.4mm] x 3" [76.2mm] MDF Board, and two Steel Uprights (dependent on door height).

For door widths between **49"** [1245mm] – **54"** [1372mm], in addition to our standard Type C or B Crowderframe Kit, the following items are included: one header track (pre-cut to suit door size), two Foot Brackets, two 72" [1829mm] x 1" [25.4mm] x 3" [76.2mm] MDF Boards, and four Steel Uprights (dependent on door height).

Load Capacity:

TYPE C EXTRA WIDTH CROWDERFRAME = 150lbs per door

TYPE B EXTRA WIDTH CROWDERFRAME = 125lbs per door

NOTE: Please specify door size when ordering.

CROWDERFRAME “2 X 6 SHIM KIT” MODIFICATION KIT

Our Standard Crowderframe Kits (shown on pages 22–23) and the above modification kits are for standard 2" x 4" wall construction. Our Crowderframe “**2 x 6 Shim Kit**” Modification allows for our standard Type “B” or “C” Crowderframe kits to be used in 2" x 6" wall construction.

Our Crowderframe “**2 x 6 Shim Kit**”, in addition to our standard Crowderframe kits includes: two 1" [25.4mm] x 1-3/8" [34.9mm] x 96" [2438mm] Plywood Shims for header track, two extra wide foot brackets, and longer screws for fastening uprights to header. This shim kit will provide an overall width from upright to upright of 5-5/8" [143mm].

Shim kit quantities are modified to suit “**Double Door**” (two shim kits required) and “**Extra Width**” kits as required.

Load Capacity:

TYPE C CROWDERFRAME with “2 x 6 SHIM KIT” = 150lbs per door

TYPE B CROWDERFRAME with “2 x 6 SHIM KIT” = 125lbs per door

NOTE: Please specify door size when ordering.

C-810 ZERO CLEARANCE HANGER C-104 TRACK

For Single & Bi-Parting, By-Passing, Pocket or Wall Mounted Doors

ZERO CLEARANCE HANGER carriage assembly is machined steel allowing a load capacity for heavy doors up to 300lbs. This system allows for a minimal clearance of 3/16" [4.8mm] between the door and underside of the track which also reduces light and sound entry. It will also allow minimal costs on materials and time when hiding the track and hanger in a bulk head. Constructed using four precision ball bearing, nylon tire wheels on a solid, machined steel body, comes complete with an adjusting wrench and Allen key for easy adjustment in the field.

- Use with Extruded Aluminum **C-104 Track**, 6063T5 Alloy
- Load Capacity **300 lbs. (two hangers)**

C-650 HANGER WITH C-650 TRACK DETAIL

DUAL TRACK BY-PASS SYSTEMS

LIGHT DUTY

C-2025 OR C-2035 WITH FASCIA C-2025 OR C-2035 TRACK

By simply interchanging the mounting of the hangers either 3/4" [19.1mm] or 1-3/8" [34.9mm] doors may be used. Slotted holes on hanger permit vertical adjustment. Available with plain track or track with built-in fascia, therefore reducing time and labour for the construction of a bulkhead or valance.

- Use with Extruded Aluminum **C-2025 Track**, 6063T5 Alloy
- Or use with Extruded Aluminum **C-2035 Fascia Track**, 6063T5 Alloy
- Load capacity **60 lbs. per door (two hangers)**

C-2025 OR C-2035 COMPLETE KIT FOR 2 DOORS

COMPLETE KITS AVAILABLE FOR DOOR WIDTHS FROM 24" [610MM] TO 72" [1829MM], AND WITH HARDWARE FOR 2 DOORS.

1 - C-2025 OR C-2035 TRACK
LENGTH: 2 X DOOR WIDTH
(EXAMPLE: 36" [914MM] DOOR = 72" [1829MM] TRACK)

1 SET - C-2025 HANGERS (3/8" [9.5MM] OFFSET [2] & 5/8" [15.9MM] OFFSET [2] COMPLETE WITH SCREWS

1 - C-1205 SELF ALIGNING FLOOR GUIDES COMPLETE WITH SCREWS

OPTIONAL PRODUCTS

C-99 Rubber Dome Bumper. (See page 69 for more details).

C-200 Guide, C-200D-138 Double Roller Guide or C-200B Spring Loaded Guide & C-201 Guide Channel. (See page 71 for more details).

C-238 or C-238S Guide Threshold for 1-3/8" [34.9mm] Doors only. (See page 71 for more details).

Hangers with Precision Ball Bearings also Available:

CROWDER DISPLAY SYSTEMS

HEAVY-DUTY SPECIAL

CROWDSLIDE TELESCOPING DOOR SYSTEM

The **CROWDSLIDE** system is a heavy-duty telescoping track system allowing individual panels to slide in and out, to view the elements on display.

- **For retail display**, the system may display doors and door frames, slatwall, or building materials, maximizing use of expensive floor space.
- **Mounted in a sturdy frame** (by others), panels can be organized to minimize the space between them.
- **Manufactured to suit custom application requirements.** The Installation shown at lower left, produced 1600 sq. ft. [148.6 sq. m.] of display within 160 sq. ft. [14.9 sq. m.] of floor space.

CROWDSLIDE COMPLETE

CROWDSLIDE DETAIL

CROWDSLIDE TELESCOPIC TYPICAL LAYOUT

PANEL WIDTH ('P')	EXTENSION LENGTH ('E')	OVERALL LENGTH ('A')	LOAD RATING*

48" [1219mm]	46" [1168mm]	56" [1422mm]	150 LBS
60" [1524mm]	58" [1473mm]	70" [1778mm]	130 LBS
72" [1829mm]	70" [1778mm]	82" [2083mm]	90 LBS

*DOORS EXCEEDING THE WEIGHT SPECIFIED MUST BE INSTALLED WITH A FRONT END CASTER. CUSTOMER IS RESPONSIBLE FOR STRUCTURAL SUPPORT AND COUNTERBALANCE.
NOTE: EXTENSION LENGTH WILL ALWAYS BE 2" [50.8mm] LESS THAN PANEL WIDTH.

CROWDER DISPLAY new

CUSTOM CROWDER DISPLAY HANGERS

C-182 HD CURTAIN HANGER

KNC's **C-182 HD** Curtain Hanger is ideal for applications using heavy curtains that our **CR-101** series cannot carry. Example applications are: for work areas with heavy curtains, sliding tools and stacking displays. Reduces stacking area in small spaces because of its two-wheel system. For use with our **C-104** or **C-108** Track. **C-104** can be curved with a 24" [610mm] minimum radius.

CPH-1 PANEL DISPLAY HANGER

Crowder Panel Hanger (CPH) is ideal for showroom product display panels. Required panel thickness is 1/4" [6.4mm]. For use with our **C-411** or **C-412** Track only. Continuous CPH Hangers can also be fabricated for full door widths. Please contact customer service for more information.

CARPET DISPLAY HANGERS

Crowder Carpet Hangers (CCH) are also ideal for showroom product display panels. The CCH hangers got their start when a retail store needed to show the different types of carpets available while keeping the space required to display its products to a minimum. **CCH-1** can be used with **C-104** or **C-108** Track. **CCH-2** can be used with **C-411** or **C-412** Track.

CCH-1 HANGER

CCH-2 HANGER

HIDDEN HARDWARE FOR DOOR PANELS

Crowder's Hidden Hardware for Door Panels is a great way to showcase multiple products on a door while keeping the visibility of sliding track & hardware to a minimum. The only products that would be visible using our Hidden Hardware system are the **C-971** Wall Track and **C-973** Wall Rail. The **C-971** & **C-973** are available in Clear or Bronze Anodized Finish to help blend in with the background.

CROWDER DISPLAY SYSTEMS

SPECIAL

FESTOONING SYSTEMS

KNCrowder offers a complete line of cable carriers and festooning systems.

- Our carriers are for cables for hoses attached with tape, cable ties or nylon tapes. This system is widely in use throughout the world.
- All tracks are rustproof extruded aluminum in lengths of up to 24' [7.32m].
- Precision Ball Bearing, Nylon tire wheels.
- Track brackets available for ease of installation.

C-116-4

Design of top plate allows for easy attachment of all types of cable and hose.

- To be used with **C-104 Track** or **C-108 Track**.

CUBICLE TRACK

Anodized aluminum ceiling mounted hospital curtain track

CROWDERTRACK offers a specially designed cubicle privacy curtain track which provides the complete screening of a patient's bed. When not in use, curtains may be drawn completely against the wall and out of the way.

The tracks and carriers are designed for quiet, smooth movement of the curtains. The simple design of the ceiling mounted system provides easy adaptation to both existing facilities and new construction.

Crowdertrack's Cubicle Track is manufactured from high quality extruded aluminum with an anodized finish for long life. Track may be surface mounted directly to the ceiling, recessed or suspended where required.

Use with Clear Anodized Extruded Aluminum **CR-101 Track** 6063T5 Alloy. Curtain carriers are nylon, each with two rolling nylon wheel units. The stainless steel chain and hooks are designed to prevent tangles, sticking and jammed curtains.

This combination of aluminum track and nylon wheels provides smooth, almost noiseless movement.

HANG-IT-ALL

PICTURE RAILS

Convenient Easy to Install... Multi-Purpose

KNC Hang-It-All Picture Rail provides the perfect way to display paintings, signs or even kitchen memos without damaging walls. Specially designed nylon picture hooks fit into the track allowing lateral movement for positioning, yet firm support, up to 20lb. per hook. The unique roller clip for paper or cardboard accepts the material as you place it in the slot and holds it firmly in place until removed with a slight twist.

The various methods of installation allow you to use Hang-It-All, virtually anywhere.

Why our grilles last longer

A combination of the nylon spacers, strong bars and threaded steel rods are the backbone of the grille. they give support and strength to the grille. Wear is minimal and the result is a quiet durable grille that stands the test of time.

- This is why our grilles are frequently used to replace competitors grilles that have deteriorated.
