

## **WPS engineering systems installations budget.**

The installations estimated cost per minutes for most WPS engineered systems, 3-4 minutes per square foot, includes the followings installation process.

- 1- Panels material handling.
- 2- Tools setup for work space.
- 3- Edge trims.
- 4- Outside and inside corners.
- 5- Midwall clips on the wall.
- 6- Horizontal joints.
- 7- Vertical joints.
- 8- Shimming as needed between wall and all trims.
- 9- Cut for electrical outlets, light sconces, elevator wall indicators, etc.
- 10- Scribe oversize panels for field cut.
- 11- Panels installations.
- 12- Cleanup work space and panels after completed installations.

Note: The above estimated cost per minutes based on 200-500 square foot or more.

Also cost based on one experience carpenter and one trainee carpenter.

All premium labor cost, scaffold, main lift or any equipments may requires for each project site conditions not included in the above cost.

We hope this will help.
