

# Ceiling Solutions That Bring Color to Life

Color options for Rockfon® acoustical tiles,  
suspension systems and metal ceilings

Project – Havas Worldwide in Chicago, IL  
Products – Rockfon® Color-all™ Lay-in 2x2 in 08-Black

# Color

Color plays a vital role in influencing our experiences inside buildings and enhancing the architectural form. Like anything in design that is important, it is also complex. The use of color is never neutral. All color conveys mood, function and atmosphere in a room. Whether you want to ignite creativity, increase productivity or make a room seem bigger or smaller, Rockfon has the ceiling solution to bring your color vision to life.

## Color & Mood: How Do You Feel?

Colors evoke physical and psychological reactions. Brightness or color temperature creates different moods and ambiance. Our perception of a color also changes depending on whether it stands alone, is dominating a space or if it exists in combination with other colors. For example, warm colors are considered stimulating, while cool colors generally have a calming effect.

There is a large body of research that shows color is a visual language internationally.

One of the most striking results about color connotations and color mood associations is their consistency cross-culturally from one individual to another. Color is an international visual language understood by all. The impression of a color and the message it conveys is of utmost importance in creating the psychological mood or ambiance that supports the function of a space.

Project – Rockfon/ROCKWOOL North American offices in Milton, Ontario  
Products – Rockfon Alaska® and Rockfon® Color-all™ in 750-Chili 2x2 Panels;  
Chicago Metallic® 4000 Temptra™ in 44-Satin Silver

### **Color & Function: Why Are You Here?**

Color schemes can even be used to indicate the purpose and usage of a space. They can be used to create boundaries and transition. Designers think about how the visual stimulation in a space will be perceived by the brain to evoke a desired cultural response. This is of utmost importance in environments where varied spaces have different tasks and functions to avoid any confusion that can cause stress in the occupants.

“A good color does not exist in isolation – like a musical note, it is in combination that it evokes emotional response.”

*Angela Wright, Color Psychologist*

### **Color & Atmosphere: Where Do You Stand?**

Color affects spatial perception, too. It is an important tool to use when shaping the feeling, appearance and atmosphere of a room. Lighter colors tend to make spaces seem bigger, while darker colors can make spaces feel more intimate. A dark ceiling also will seem lower than it really is, or – if installed high enough above – it can simply disappear.

Darker-colored ceilings create a more intimate atmosphere.

### **Color & Performance: Envision Greater Possibilities**

We develop intelligent ceiling solutions that actively address a number of important issues in modern buildings and renovation projects. Rockfon products are known for their design, aesthetics and ease of installation, as well as their key performance features of superior fire safety and acoustics. Our acoustic solutions are among the highest performing, most cost effective and time efficient in the market. Create a thought-provoking palette to spark creative spirit and make a positive impact on the whole mood of a space.

### **Wood vs. Metal: Make a Great Impression Without Giving up Performance**

Often high-end designs call for the aesthetic of wood. By using metal ceiling panels finished in wood tones, you can capture the beauty of wood without the headaches of real wood, such as the adverse impacts caused by exposure to humidity and sunlight. Our MetalWood® finishes can be used for interior and exterior applications. With metal, less maintenance is required and performance specifications can be easily met.

## **Create Visual Impact for Your Surroundings**

Establish harmony, warmth or comfort. Infuse energy or elegance. With our six Rockfon® Color-all™ inspirational themes, you can create the impact your design scheme calls for.

### **City Tones:**

Light to dark, shades and shadows, greys bring elegance to urban atmospheres.

### **Natural Tones:**

Far from rustic, the warmth of beiges and browns enhances natural architecture, bringing new life and authentic ambience.

### **Sensorial Tones:**

Encompass the fresh natural elements of air, water and light to enhance daily well-being.

### **Energetic Tones:**

Escape the limits imposed by daily routine and enter a high-energy world!

### **Precious Tones:**

Metallics add elegance and distinction – not bling.

### **Sophisticated Tones:**

Deep, distinguished colors create audacious settings.

## Get the Wood Look You Desire

With Rockfon, you no longer have to choose between color and acoustics. Our wood look finishes offer a distinct design to any of our metal ceiling products while still maintaining acoustic absorption.

Color enhances well-being, stimulates creativity, adds glamour and elegance and creates bold settings.

### Can't Find the Color You're Looking For?

Rockfon offers a color-matching program for our **Suspension Systems** and **Specialty Metal Ceilings** solutions. Get the color you need to bring your inspiration to life.
